

A Checklist of The Birds of S. Gloucestershire

A Checklist of The Birds of South Gloucestershire

www.thebirdsofsouthgloucestershire.co.uk

5th Edition June 2020

INTRODUCTION

This is the fifth edition of a checklist of the Birds Of South Gloucestershire and has been prepared reflecting the status of species and forms believed to have occurred in a naturally wild state within the recording area.

It incorporates all of the changes to the British List up to and including December 2017 and fully aligns with that of the International Ornithological Congress (IOC).

The South Gloucestershire Systematic List follows the conventions of The BOU British List: A Checklist of Birds of Britain (9th edition) December 2017 which came into effect on January 1st 2018.

THE LIST

The S. Glos List is under continuous revision; species and forms are either added or removed following rigorous assessment and are updated on the TBOSG website. Changes to the list are adopted with immediate effect.

NB: All sightings of rare and scarce birds are subject to ratification by the appropriate rarities committee!

TAXONOMY

In 2017, following a detailed review TBOSG has adopted, from the 1st January 2018, the International Ornithological Union's (IOU) IOC World Bird List (Gill & Donsker 2017) for all its taxonomic needs.

This is the first edition of the S. Glos List following the IOC World Bird List. Any future changes to the IOC list will be adopted unequivocally.

SPECIES/ FORMS NAMES

The S. Glos list will use the English names for species and forms used by the International Ornithological Union's (IOU) IOC World Bird List (Gill & Donsker 2017).

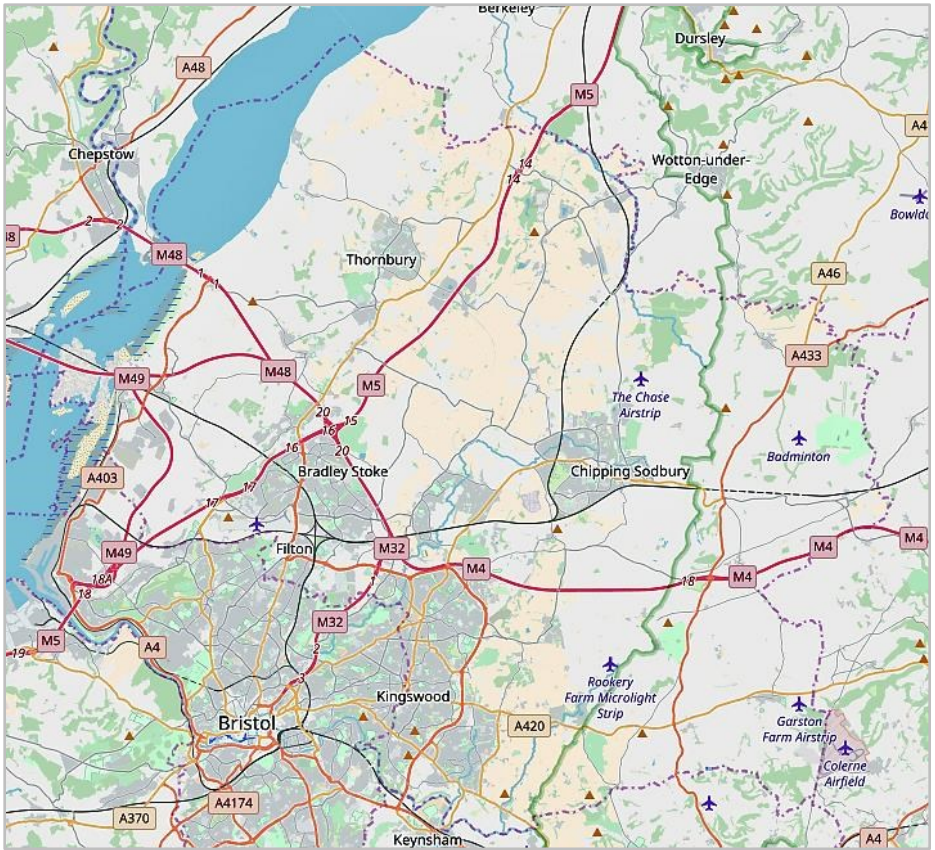

Fig.1 The S. Glos recording area. An interactive map accessed via; <https://southglos.info/sg/map>

CATEGORIES

A: Birds recorded in the UK in an apparently natural state at least once since January 1st 1950.

B: Birds recorded in the UK in an apparently natural state at least once between January 1st 1800 and December 31st 1949, but not subsequently.

C: Birds that, although introduced, now derive from the resulting self-sustaining populations.

THE S. GLOS SYSTEMATIC LIST

Each taxon is headed followed by the vernacular name, scientific name, category, number, location and date of first documented reference. Full species are in capitals, forms in lower case.

GEESE, SWANS, DUCKS

DARK-BELLIED BRENT GOOSE	<i>Branta bernicla</i>	A
Pale-bellied Brent Goose	<i>Branta bernicla hrota</i>	A
