

A Checklist Of The Birds Of S.
Gloucestershire

A Checklist Of The Birds Of South Gloucestershire

INTRODUCTION

This is the third edition of the checklist of the Birds Of South Gloucestershire and has been prepared reflecting the status of species and forms believed to have occurred in a naturally wild state within the recording area.

It incorporates all of the changes to the British List up to and including December 2017 and fully aligns with that of the International Ornithological Congress (IOC).

The South Gloucestershire Systematic List follows the conventions of The BOU British List: A Checklist of Birds of Britain (9th edition) December 2017 which came into effect on January 1st 2018.

THE LIST

The S. Glos List is under continuous revision; species and forms are either added or removed following rigorous assessment and are updated on TBOSG website www.thebirdsofsouthgloucestershire.co.uk Changes to the list are adopted with immediate effect.

All sightings of rare and scarce birds are subject to ratification by the appropriate rarities committee!

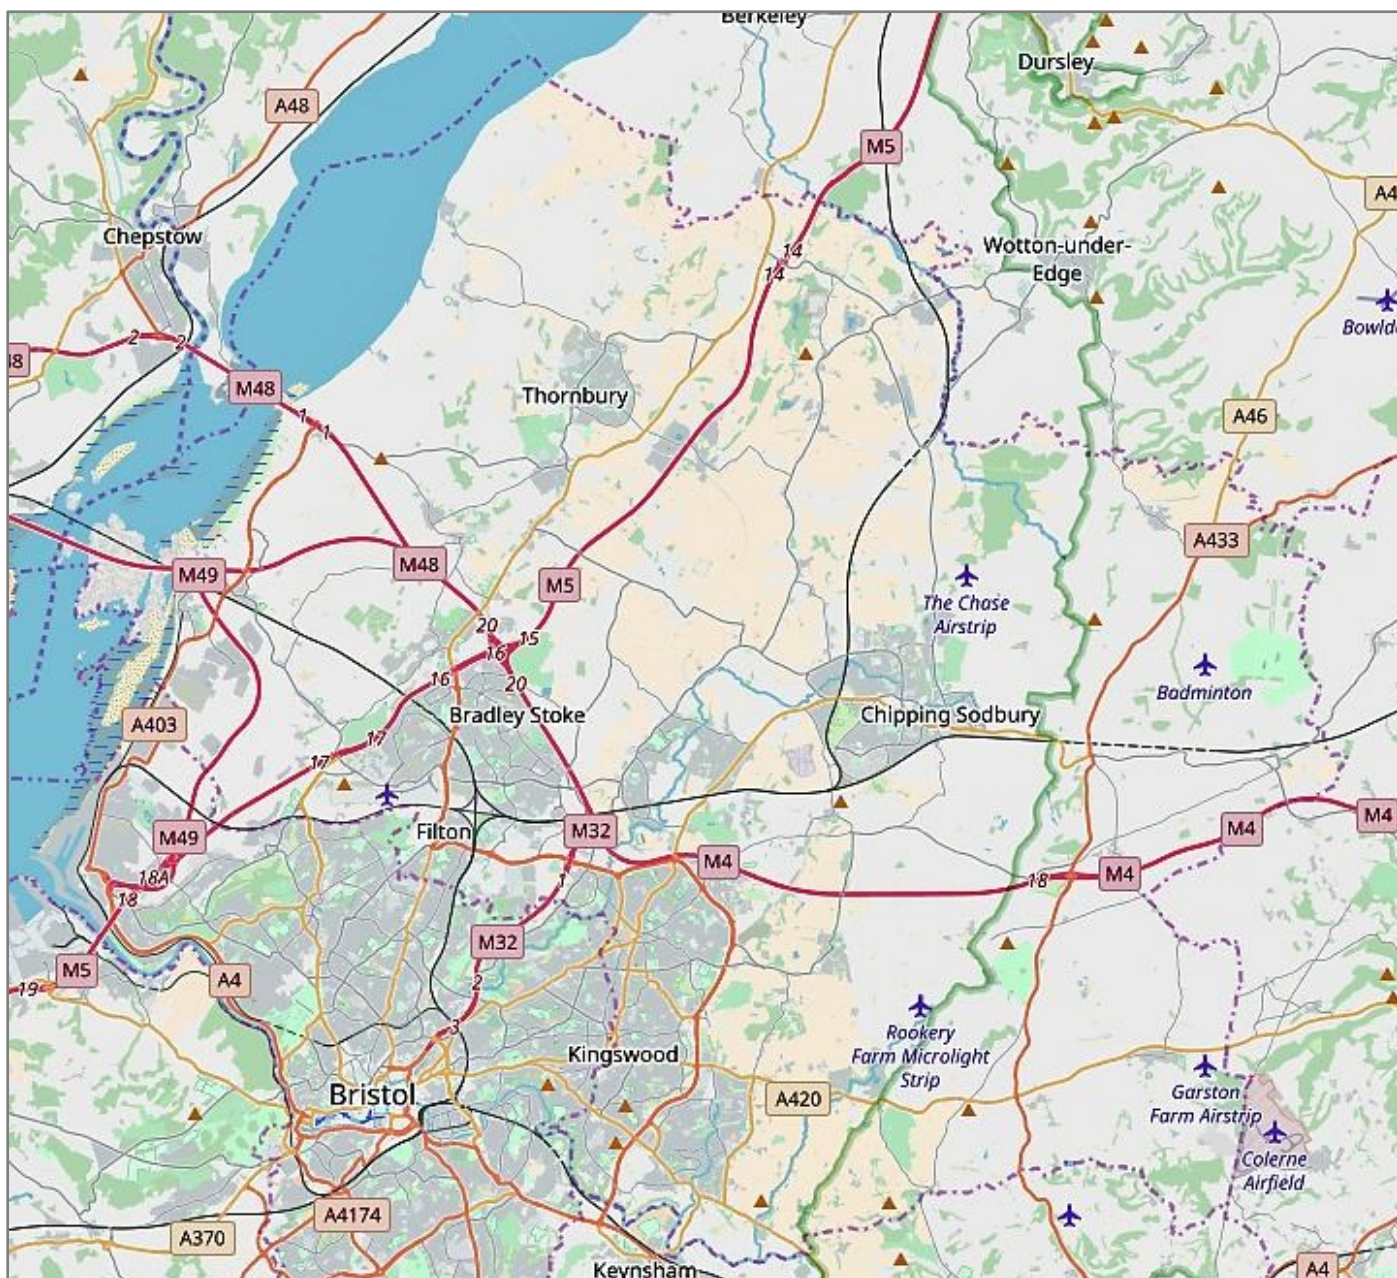

TAXONOMY

In 2017, following a detailed review TBOSG has adopted, from the 1st January 2018, the International Ornithological Union's (IOU) IOC World Bird List (Gill & Donsker 2017) for all its taxonomic needs.

This is the third edition of the S. Glos List following the IOC World Bird List. Any future changes to the IOC list will be adopted unequivocally.

SPECIES/ FORMS NAMES

The S. Glos list uses the English names for species and forms used by the International Ornithological Union's (IOU) IOC World Bird List (Gill & Donsker 2017).

CATEGORIES

- A: Birds recorded in the UK in an apparently natural state at least once since January 1st 1950.
- B: Birds recorded in the UK in an apparently natural state at least once between January 1st 1800 and December 31st 1949, but not subsequently.
- C: Birds that, although introduced, now derive from the resulting self-sustaining populations.

THE S. GLOS SYSTEMATIC LIST

Each taxon is headed followed by the vernacular name, scientific name and category. Full species are in UPPERCASE, forms in lower.
